Additional staff.

(From the D.F. No. 1991-C/39-7 dt 19.9.39)

To A.S.

Please see the D.F. is below at pp 1-2 ante. The Director's proposal for the employment of an additional teacher in each of the schools at Byndur, Karwar Malpe and Bekal involves an average extra recurring cost of Rs. 1596. Owing to the emergency created by the war it is necessary that the expenditure should be economised. From the statements at pp 3-6 ante it will be seen that the average attendance in any of the sections of classes in all the four schools has not exceeded the limit of 35 prescribed in the Elementary Education Rules for forming a new section. As no new sections are to be formed the four schools referred to may continue to be managed with the existing staff of teachers. For orders whether the Director may be informed accordingly.

33 1/2 × 12 = 133 × 12 = 1596

(2) 46 × 2 in Bekal the average attendance of A and B is only 59 (30 + 29) ∴ A & B is 1)

P.T.O

Judged by the average number which the rules permit of being handled by a single teacher, it would appear that the existing strength in the four schools should prove sufficient; but having regard to the number of classes, an additional teacher for each school would seem justified. The case of each School is examined below:-

Byndur: Here there are five classes with three teachers. The first class has 26 students and the fifth class has 9 students. Though it is not advisable to combine the lowest and the highest classes, still in view of the need for economy one teacher may be permitted to handle these classes. One teacher is required for the second class of 34 children. The third teacher can manage III & IV classes with an aggregate strength of 35. So no additional teacher is required for this school.

Navunda School: The first class is divided into 2 sections as the ~~total strength~~ av. attendance is 56. This division is justified under the proviso to rule 16 (2). Then there are four other classes. Allowing one teacher for class I(A), one for I(B) & IV, one for II & V, one more teacher will be required to handle the remaining class. So four teachers are required here against three, sanctioned staff.

Malpe School: This is a school with 5 standards and 2 teachers. In any combination one extra teacher will be required.

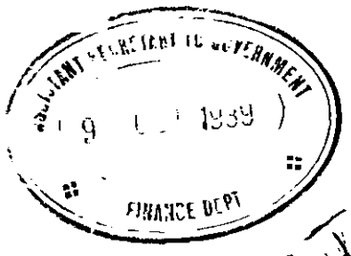
Bekal School:

This is a school with 5 standards and 4 teachers. Two standards have been divided into two sections each. Thus there are altogether 7 classes but there are only four teachers. One additional teacher is necessary.



The need for economy is recognised but schools, if retained, must be conducted efficiently. Otherwise there is a case more for abolition of these schools than for running them with inadequate staff and inefficient methods. This department may therefore ask for three additional teachers for three of these schools.

Remarks of Finance may be invited.

Please see the note of the Development Deptt. at pp.1-3 ante.

In the circumstances stated by them, this department may agree to the employment of an additional teacher for the schools at Nawunda and Malpe.

14.10.39 As regards the Bekal school where there are four teachers now, there are only 7 classes with average attendance as follows:

Without placing more than two classes in charge of a teacher, it would be possible to run the school with the existing staff of four teachers by ~~III~~, II.A & IV and II.B & V combining say I-B and ~~II-A, II-B and III,~~ and ~~IV and V.~~ This Department may suggest that no additional teacher be employed for this school.

Such combinations is usual - vide also Dev. note on p. 2 ante.

Sanction is accorded to the employment temporarily till the Ist April 1941 of an additional teacher of the Higher Elementary grade in each of the fisheries schools at Navunda and Malpe.
